Special Edition Referees xvi

SECTION I: ECOLOGY

Ecology of Freshwater Plants

Photosynthetic plasticity in *Potamogeton pectinatus* L. from Argentina: strategies to survive adverse light conditions
by M.J.M. Hootsmans, A.A. Drovandi, N. Soto Perez & F. Wiegman 1–5

Studies on vegetative production of *Potamogeton illinoensis* Morong in southern Argentina
by C. Bezic, A. Dall'Armellina & O. Gajardo 7–10

Diurnal carbon restrictions on the photosynthesis of dense stands of *Elodea nuttallii* (Planch.) St. John
by J.I. Jones, K. Hardwick & J.W. Eaton 11–16

Comparison of five media for the axenic culture of *Myriophyllum sibiricum* Komarov
by R.D. Roshon, G.R. Stephenson & R.F. Horton 17–22

The effects of floating mats of *Azolla filiculoides* Lam. and *Lemna minuta* Kunth on the growth of submerged macrophytes
by R.A. Janes, J.W. Eaton & K. Hardwick 23–26

The biology of *Butomus umbellatus* in shallow waters with fluctuating water level
by Z. Hroudová, A. Krahulcová, P. Zákravský & V. Jarolímová 27–30

Growth response of *Bolboschoenus maritimus* ssp. *maritimus* and *B. maritimus* ssp. *compactus* to different trophic conditions
by P. Zákravský & Z. Hroudová 31–35

Mineralogical and microscopic analyses of material deposited on submersed macrophytes in Florida lakes
by P.V. Zimba & S.R. Bates 37–41

Plant–Environment Interactions in Freshwater Systems

Assessing functional typology involving water quality, physical features and macrophytes in a Normandy river
by J. Haury 43–49

The effects of a record flood on the aquatic vegetation of the Upper Mississippi River System: some preliminary findings
by A. Spink & S. Rogers 51–57

Monitoring watercourse vegetation, a synecological approach to dynamic gradients
by R. Pot 59–65

A reference system for continental running waters: plant communities as bioindicators of increasing eutrophication in alkaline and acidic waters in northeast France
by F. Robach, G. Thiébaut, M. Trémolières & S. Muller 67–76
The impact of three industrial effluents on submerged aquatic plants in the River Nile, Egypt
by M.M. Ali & M.E. Soltan 77–83
Effects of lake water level regulation on the dynamics of littoral vegetation in northern Finland
by S. Hellsten & J. Riihimäki 85–92
Influence of plants on redox potential and methane production in water-saturated soil
by W. Grosse, K. Jovy & H. Tiebel 93–99

SECTION II: DISTRIBUTION

Freshwater Plants and Aquatic Weed Problems
The aquatic microphytes and macrophytes of the Transvase Tajo-Segura irrigation system, southeastern Spain
by M. Aboal, M. Prefasi & A.D. Asencio 101–107
Aquatic vegetation of the Orinoco River Delta (Venezuela). An overview
by G. Colonnello Bertoli 109–113
Submerged vegetation development in two shallow, eutrophic lakes
by H. Coops & R.W. Doef 115–120
Noxious floating weeds of Malaysia
by M. Mansor 121–125
Past and present distribution of stoneworts (Characeae) in The Netherlands
by J. Simons & E. Nat 127–135
Macrophytes and flood plain water dynamics in the River Danube ecotone research region (Austria)
by G.A. Janauer & G. Kum 137–140
Stream vegetation in different landscape types
by S. Husak & V. Vorechovska 141–145
Coexistence of *Juncus articulatus* L. and *Glyceria australis* C.E. Hubb. in a temporary shallow wetland in Australia
by R.G.B. Smith & M.A. Brock 147–151

SECTION III: MANAGEMENT

Control of Freshwater and Riparian Vegetation

Strategic and Regional Studies
Interactions between national and local strategies for the management of aquatic weeds
by D.S. Mitchell 153–156
The economics of aquatic vegetation removal in rivers and land drainage systems
by J.A.L. Dunderdale & J. Morris 157–161
The management of weeds in irrigation and drainage channels: integrating ecological, engineering and economic considerations
by P.J. Barker, C.M. Ferguson, I.K. Smout & P.M. Wade 163–172

Short- and long-term control of water lettuce (*Pistia stratiotes*) on seasonal water bodies and on a river system in the Kruger National Park, South Africa
by C.J. Cilliers, D. Zeller & G. Strydom 173–179
Strategies for water hyacinth (*Eichhornia crassipes*) control in Mexico
by E. Gutiérrez, R. Huerto, P. Saldaña & F. Arreguín 181–185
Management of *Hydrocotyle ranunculoides* L.f., an aquatic invasive weed of urban waterways in Western Australia
by R.J. Ruiz-Avila & V.V. Klemm 187–190
Submerged plant survival strategies in relation to management and environmental pressures in drainage channel habitats
by M.R. Sabbatini & K.J. Murphy 191–195

Chemical and Physical Approaches
The impact of drainage maintenance strategies on the flora of a low gradient, drained Irish salmonid river
by J.J. King 197–203
The effect of weed control practices on macroinvertebrate communities in Irish canals
by C. Monahan & J.M. Caffrey 205–211
Physical control of Eurasian watermilfoil in an oligotrophic lake
by C.W. Boylen, L.W. Eichler & J.W. Sutherland 213–218
Response of *Elodea canadensis* Michx. and *Myriophyllum spicatum* L. to shade, cutting and competition in experimental culture
by V.J. Abernethy, M.R. Sabbatini & K.J. Murphy 219–224
Mechanical aquatic weed management in the lower valley of the Rio Negro, Argentina
by A. Dall'Armellina, A. Gajardo, C. Bezic, E. Luna, A. Britto & V. Dall'Armellina . 225–228
Patterns of aquatic weed regrowth following mechanical harvesting in New Zealand hydro-lakes
by C. Howard-Williams, A.-M. Schwarz & V. Reid 229–234
Hydrilla control with split treatments of fluridone in Lake Harris, Florida
by A.M. Fox, W.T. Haller & D.G. Shilling 235–239
Crassula helmsii: attempts at elimination using herbicides
by F.H. Dawson 241–245
Hydrilla tuber formation in response to single and sequential bensulfuron methyl exposures at different times
by K.A. Langeland 247–251
Glyphosate as a management tool in carp fisheries
by A. Krüger, G. Okoniewska, Z. Pochitonow, Z. Król & R.P. Garnett 253–257
Glyphosate in fisheries management
by J.M Caffrey 259–263
The use of herbicides for weed control in flooded rice in North Italy
by A.C. Sparacino, S. Bocchi, R. Ferro, N. Riva & F. Tano 265–269

Biological and Biomanipulative Approaches

The interaction between *Cyprinus carpio* L. and *Potamogeton pectinatus* L. under aquarium conditions
by N.S. Sidorkewicj, A.C. López Cazorla & O.A. Fernández 271–275

Long-term effects of sheep grazing on giant hogweed (*Heracleum mantegazzianum*)
by U.V. Andersen & B. Calov 277–284

Effects of grazing by fish and waterfowl on the biomass and species composition of submerged macrophytes
by E. van Donk & A. Otte 285–290

Biological control of the wetlands weed purple loosestrife (*Lythrum salicaria*) in the Pacific northwestern United States
by G.L. Piper 291–294

Control of Algae

Filamentous freshwater macroalgae in South Africa – a literature review and perspective on the development and control of weed problems
by M.A. Joska & J.J. Bolton 295–300

Towards understanding the nature of algal inhibitors from barley straw
by I. Ridge & J.M. Pillinger 301–305

The control of diatom and cyanobacterial blooms in reservoirs using barley straw
by P.R.F. Barrett, J.C. Curnow & J.W. Littlejohn 307–311

Utilisation of Freshwater and Riparian Vegetation

Multiple use of aquatic green biomass for food/feed protein concentrate, bioenergy and microbial fermentation products
by V.N. Pandey & A.K. Srivastava 313–316

Morphology and nutritional value of *Aponogeton undulatus* Roxb. growing in deeply flooded areas in Bangladesh
by Q.R. Islam 317–321

Constructed wetlands for waste water treatment: the use of laterite in the bed medium in phosphorus and heavy metal removal
by R.B. Wood & C.F. McAtamney 323–331

Backwater habitats and their role in nature conservation on navigable waterways
by N.J. Willby & J.W. Eaton 333–338

Experimental revegetation of the regulated Lake Ontojärvi in northern Finland
by S. Hellsten, J.I. Riihimäki, E. Alasaarela & R. Keränen 339–343

Enhancing river vegetation: conservation, development and restoration
by S.M. Haslam 345–348

Bankside stabilisation through reed transplantation in a newly constructed Irish canal habitat
by J.M. Caffrey & T. Beglin 349–354
